

System Request – Android Task Monitoring

Project Sponsor: Mary Girgis Hanna ,Kirollos George Refaat, Marian Ashraf Boshra, , Clara Bassem Fekry, Maria Ayman Ibrahim.

Business need: We are so busy in our daily lives right now that it becomes impossible to keep track of our daily events, meetings, and appointments.

To address this issue, this project focuses on developing a Weekly Task Alerting System for Android devices that can alert users of the tasks/appointments that are scheduled for each day in a week.

Business Requirements: This project is exclusively designed to:

- Simplify the tracking and monitoring of day-to-day activities of the busy modern life.
- Users can use this application to set goals and achieve them, thereby increasing productivity and simplifying their lives.
- The developed project is a tasks reminder app, with AI-powered Chatbot that will make user enjoy productivity.
- Users can give preferences to each task
- Secured accounts
- No need to utilize mind in remembering routine tasks
- You will have the ability to listen to music
- Study stream
- Pomodoro technique

Business value:

The app's cost will be 50\$ per download so the following will be the tangible value to the company:

Total benefits in sales from downloading is (22,500,000\$).

Total benefits in sales from advertisements is (8640\$)

Total Net benefits = 21,213,792\$

NPV = 14,988,213\$ (**NPV > 0 so our project is acceptable**)

Special Issues or Constraints:

- Illegal in some Countries for political reasons.
- Application only compatible with android devices.
- Few users may find it difficult to deal with application.
